Project Description for Heuristic Evaluation

1. **Name**: STUDYSESH

2. **Team**: Study Sesh - studyseshteam@gmail.com

3. **Goal**:

   To help students easily find classmates to study with.

4. **Purpose**:

   Provide an easy way for students to both know the locations of all on-going study sessions that relate to classes they're taking, and easily create study sessions to attract others.

5. **User**:

   The target users are current college students who have a need to do classwork with others.

6. **Tasks**:

   a. Look at what study sessions are going on and some information about them

   b. Create study sessions for other classmates to attend

   c. Add/remove classes you are currently taking

7. **Limitation**:

   a. There is no way to "join" study sessions in the app; you join the session by simply showing up to the location that you see on the map.

   b. No automatic session size count; creator of session manually increments or decrements number

c.   Currently optimized for iPhone 6 without support for other systems.

8. **Prototype**:
